

Java Favorite Song

Time required: 30 minutes

Please read the directions carefully before beginning the assignment.

- Comment your code as shown in the tutorials and other code examples.
- Follow all directions carefully and accurately.
- Think of the directions as minimum requirements.

Pseudocode

1. Write pseudocode for the exercise.

Here's What I Want You to Do

Create a program that displays the title, artist, and the first few lines of your favorite song.

Here's Why I Want You to Do It

Demonstrate understanding of:

Printing to the console

Minimum Requirements

Write, compile, and test a Java class that displays the title, artist, and the first few lines of your favorite song.

Create a Java program named: **FavoriteSong.java**

Copy and paste the following starter code into your program.

```
// Name: FavoriteSong.java
// Written by:
// Written on:
// Purpose: Print the title and first few lines of your favorite song

public class FavoriteSong {
    public static void main(String[] args) {
        // Write your code here

    }
}
```

Example run:

```
Sweet Baby James
by James Taylor
There is a young cowboy, he lives on the range
His horse and his cattle, they're his only companions
He works in the saddle and sleeps in the canyons
Just waiting for summer, his pastures to change
```

Assignment Submission

1. Attach the pseudocode.
2. Attach the program files.
3. Attach screenshots showing the successful operation of the program.
4. Submit in Blackboard.
